2. Introduction

A paragraph followed by an unordered list ^[1] with square bullets. ^[2]

- item 1
- item 2

Here's how you say "Hello, World!" in Java:

HelloWorld.java

```
public class HelloWorld {  
    public static void main(String[] args) {  
        System.out.println("Hello, World");  
    }  
}
```

[1] AsciiDoc supports unordered, ordered, and description lists.

[2] You may choose from square, disc, and circle for the bullet style.

3. Plantuml Diagram

3.1. Sequence Diagrams

Basic examples The sequence \rightarrow is used to draw a message between two participants. Participants do not have to be explicitly declared. To have a dotted arrow, you use $\dots\rightarrow$

It is also possible to use \leftarrow and \leftarrow . That does not change the drawing, but may improve readability. Note that this is only true for sequence diagrams, rules are different for the other diagrams.
